

2020- The Year of Harvest

Month of 'Fertilizing'

We've crossed the first month of the new decade, and as we walk into the new month, the shortest month, but the month that's special once in 4 years.

The theme for this month is fertilizing. Now, not all of us have done farming or are experts in agriculture. But from the little knowledge that comes from school text books and National Geographic Channel, we know that fertilizing is an important part of farming. "Fertilizers are chemicals that are added to soil to supply nutrients to make it more fertile. The chemicals in fertilizers contain essential elements required for plant growth". Now the soil does not have all the necessary nutrients and chemicals it needs, and to make sure that the soil gives good and plentiful growth, fertilizers are added. These fertilizers provide the required nutrients to the soil.

In our life too, as we take time to grow closer to God, as we equip ourselves and we prepare for the harvest. We need to understand the importance of equipping our minds and hearts for the harvest. We cannot skip over the step of fertilizing and wait for the harvest. There won't be an abundant harvest until we are prepared to equip our land. Let's take extra steps, go out of our way to make sure that our hearts and minds are prepared to receive the seeds, and in due time have an abundant harvest. It may take some time, it may take effort, it may lead to some sacrifices which needs to be made and it may be outside our comfort zones, but it is vital for a harvest. No step is too little, every single thing that we do will impact the harvest we await.
